

This is what Gary Arnold (Chief Engineer for Hawker Pacific at Bankstown) had to say about NAS:

"We found the services provided by the team, to be efficient and professional, with up to ten engineers being provided at one stage. We found they were able to provide labour at short notice, providing the flexibility of manpower required to complete this type of project. Using NAS, enabled Hawker Pacific to deliver these aircraft on time and on budget."

Here are other some comments from Gary Leach at Polynesian Airlines:

"The work was carried out most effectively and was completed ahead of time and within budget. Polynesian Airlines is most satisfied with the efficient and professional manner in which the project was implemented and carried out"
